

Webinar Discussion

AI in the lending experience: Understanding the risks and opportunities for financial institutions

Thursday, 30 November, 2023 | 3 pm CET

[About the Event](#)[Key Takeaways](#)[The Webinar Panel](#)[Download Now](#)

WHY ATTEND?

IDC predicted that 2023 would bring a shift in the lender-borrower relationship, as consumer and small business borrowers expect convenience and immediacy in the loan application and decisioning process.

What does this look like in practice? Both traditional and fintech lenders are operating in a highly competitive market, where they must leverage cloud opportunities with artificial intelligence (AI), big data, analytics, and mobility.

Join Microsoft and Mambu for this panel discussion where we will explore the growth opportunities and typical roadblocks to deploying new technologies such as generative AI.

[Let's Chat!](#)

We will cover:

- How early adopters of AI are achieving internal efficiencies in the lending journey
- The latest predictions around generative AI
- Risks to consider with AI adoption in a highly regulated environment
- What human expertise and support is needed with an AI business model
- Why a cloud ecosystem model must be at the core of any modern-day lender

This session will include a Q&A with the audience. Don't forget to send us your questions when you register for the webinar - even if you can't make it, we'll ensure that your questions are answered.

KEY TAKE-AWAYS

Practical examples
of AI in lending

Risks to consider
with AI adoption

Typical roadblocks to
implementation with
legacy systems

The latest predictions
around generative AI
